11. Logo Discussion - Andrew Ernest, Ph.D., P.E.
12. Listserv - Christopher Fuller, Ph.D.
13. Agenda, Date and Venue for Next Meeting - Christopher Fuller, Ph.D., Tim Cawthon
14. Other
15. Adjourn

CITY OF PALMHURST STORMWATER MANAGEMENT

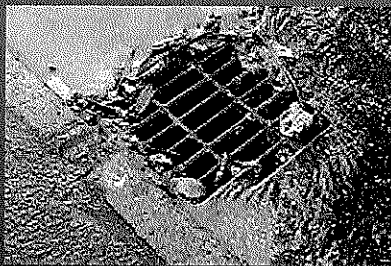

WHAT IS STORMWATER?

- ▶ Rain that runs off pavements and rooftops which carry pollutants such as: pet waste, oil, grease, fertilizers, which make its way to a local ditches and canals, eventually reaching the Laguna Madre.

DOES STORMWATER CAUSE FLOODING PROBLEMS?

- ▶ Yes, with excess runoff caused by the decrease in absorption can cause flooding. In addition, garbage picked up by these waters can also clog the drainage system, causing a slowdown in the drainage ability of the City's system. A combination of these two events has the potential to cause flooding within the City.

WHAT TO DO IF YOU SEE ILLEGAL DUMPING INTO THE STORM DRAINS, DITCHES, OR CANALS

- ▶ This type of activity is illegal and will be handled through ticketing, fines, and in some cases jail time. If possible call the City of Palmhurst Police Department (956) 519-3800 or contact the Stormwater Specialist at (956) 388-8211 or (956)388-8999.
