Dear Exhibitor:

The Lower Rio Grande Valley TPDES Storm Water Task Force is pleased to announce its 24th Annual Water Quality Management and Planning Conference to be held June 6-10, 2022 at the Beach Resort at South Padre Island, Texas.

We expect 200-250 participants at this five (5) day event. The conference will begin on June 5th with the offering of continuing education courses and workshops in certified stormwater inspector and HEC-RAS courses. The technical sessions will be held from June 6-7, 2022. Participants will primarily consist of water quality professionals, stormwater runoff industry stakeholders and professionals, estuary program stakeholders and state-wide Phase II TPDES municipalities. The exhibition of products and services is an integral part of the conference, providing attendees access to sources of relevant equipment, products, and innovative technology. Ample opportunities for attendees to view exhibits are provided during registration, coffee breaks, lunches, and dinner.

The vendor exhibit cost per table is \$1200. This fee includes a 6' skirted table, two chairs, power strip (if requested in submission form) and one complimentary Conference Meal Ticket (for one person, for all meals during conference). Exhibitor personnel will also receive complimentary registration for entrance to the exhibitor area only, and they may register additional staff at the conference discounted rate.

Benefits of exhibiting include:

1. Reach a wide audience comprised of industrial representatives, consulting groups, regulatory folks, environmental organizations, academia and the general public.
1. Increase networking potential in a growing South Texas market.
2. A comprehensive database of conference attendees will be made available to exhibitors.

Don't delay! The number of tabletop exhibits is limited. Space will be filled on a first-come, first-served basis. To reserve your space, please complete the attached application and return with your full payment.

This conference will provide you with access to numerous local government officials, international, federal and state regulators, local environmental industries, and academia researchers. Topics of interest will range from the TPDES stormwater program, TPDES MS4 compliance, innovative best management practices (BMPs), municipal stormwater management programs, non-point source pollution, urban storm water management, smart growth, low impact development, water reuse, and water recycling. If you have questions, please contact Javier Guerrero at jguerrero@office.ratesresearch.org or Deanna LeVrier at dlevrier@office.ratesresearch.org
